Jerry Turner
300 Lake Palourde Road
Amelia, LA 70340

Jerry,

I am sending you this letter to commend RBT Welders LLC; in the fine job the welders did that were sent to us. This is the second time we have used your services, and both experiences were equally positive. Rey Vazquez was very helpful in keeping the job flowing and organized, through his ability to communicate with the guys that had minimal English speaking skills. All of your workers were polite, hard working and kept the pace consistent throughout the job. This project was all complete joint penetration welding, using the FCAW process with a great amount of carbon-arc gouging. The testing criteria was as strict as it gets, which was to tension criteria according to D1.5-2008 Bridge Code. Their reject rate was minimal, which is outstanding. Thank you again, and we certainly know whom to contact when needing services such as yours.

Sincerely,

Ross Wallace

Ross Wallace, Welding Supervisor/Safety Director
